Step 4: Analytical Queries on Redshift Cluster

Solving analytical queries on Redshift Cluster

Here, you have to write the query used for solving the question and the screenshots of the table which is outputted after the query is run on the AWS Redshift Query editor UI.

1. Top 10 ATMs where most transactions are in the 'inactive' state

Query :

```
select a.atm_number, a.atm_manufacturer, l.location,
count(trans_id) as total_transaction_count,
sum(case when atm_status = 'Inactive' then 1 else 0 end) as
inactive_transaction_count,
(inactive_transaction_count/total_transaction_count)*100 as count_percent
from atm_trans_data.fact_atm_trans f, atm_trans_data.dim_atm a,
atm_trans_data.dim_location l
where f.atm_id = a.atm_id and a.atm_location_id = l.location_id
group by a.atm_number, a.atm_manufacturer, l.location
having count_percent > 50
order by inactive_transaction_count desc
limit 10;
```

Screenshot of the resultant table :

Result 1 (10)					
atm_number	atm_manufacturer	location	total_transaction_count	inactive_transaction_c...	count_percent
16	NCR	Skive	44043	44043	100

2. Number of ATM failures corresponding to the different weather conditions recorded at the time of the transactions

Query :

```
select f.weather_main,
count(trans_id) as total_transaction_count,
sum(case when atm_status = 'Inactive' then 1 else 0 end) as inactive_count,
case when coalesce(inactive_count, 0) = 0 then 0.0000
else trunc((cast(inactive_count as
numeric(10,4))/total_transaction_count)*100, 4)
end as inactive_count_percent
from atm_trans_data.fact_atm_trans f
where f.weather_main != ''
group by f.weather_main
order by inactive_count_percent desc
limit 10;
```

The screenshot shows the AWS Redshift query editor v2 interface. The left sidebar displays the database structure, including the 'atm_trans_data' schema with tables 'dim_atm', 'dim_card_type', 'dim_date', 'dim_location', and 'fact_atm_trans'. The main editor area contains the SQL query for finding the most active day in each ATM from the location 'Vejgaard'. The query is executed, and the results are displayed in a table at the bottom of the editor.

atm_number	atm_manufacturer	location	weekday	total_transaction_count
103	Diebold Nixdorf	Vejgaard	Friday	4757
2	NCR	Vejgaard	Friday	6290
